

VICTOR

Full-Stack Developer | React · Node.js · TypeScript · PostgreSQL

jegedetomiwa1@gmail.com | linkedin.com/in/tomiwa-jegade-417310263 | github.com/Tomiwa-Jegade | Available for Remote Roles

PROFESSIONAL SUMMARY

Full-Stack Developer and founder with hands-on experience building and deploying production web applications using React, Node.js, TypeScript, Express.js, PostgreSQL, and REST APIs. Experienced across the full application lifecycle, including frontend architecture, backend services, database design, third-party integrations, automated testing, debugging, deployment, and ongoing optimisation. Strong focus on clean, reusable code, reliable user experiences, and solving technical problems across the stack.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Vite, Tailwind CSS, React Router, Responsive UI Development

Backend: Node.js, Express.js, Nest.js, RESTful API Design & Integration

Database: PostgreSQL, Neon, Prisma ORM, Database Schema Design

Testing & Debugging: Playwright, End-to-End Testing, API Testing with Postman, Browser/Responsive Testing

Integrations: Flutterwave, Brevo, Google Sheets API, Cloudinary, WhatsApp, TikTok Events API, Google Analytics

Tools: Git, GitHub, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

Founder & Lead Developer | Convertly

2024 – Present • Remote

- Founded and built a digital growth company delivering full-stack web applications, customer acquisition systems, automation workflows, and AI-assisted customer solutions for SMEs.
- Designed and implemented web applications using React, JavaScript/TypeScript, Node.js, Express.js, Nest.js, REST APIs, and third-party services.
- Built reusable frontend components and backend services with a focus on maintainability, reliable data flow, and responsive user experiences.
- Designed lead-tracking dashboards that aggregate inquiries from web, WhatsApp, and social channels into structured data for business operations.
- Built automated workflows connecting forms, APIs, email services, spreadsheets, and business systems, reducing repetitive manual operations.
- Owned projects through requirements gathering, architecture, implementation, debugging, testing, deployment, and post-launch optimisation.

Front-End Developer | Freelance / Contract

2022 – Present • Remote

- Designed and developed responsive React applications and reusable UI components for clients across multiple industries.
- Integrated REST APIs and backend services into frontend applications, ensuring reliable data flow and consistent user experiences.
- Optimised applications for performance, accessibility, responsiveness, and cross-browser compatibility.
- Translated business and product requirements into maintainable, user-friendly digital products.

SELECTED PROJECTS

Jegz Menswear — Full-Stack E-commerce Platform

React (Vite) · JavaScript/TypeScript · Tailwind CSS · Node.js · Express · Nest.js · PostgreSQL/Neon · Prisma · Flutterwave · Brevo · Playwright

- Independently designed, built, and launched a production full-stack e-commerce platform for a Nigerian menswear brand, owning the application across frontend, backend, database, payments, administration, marketing automation, analytics, and QA.
- Built a complete product catalogue with variants, size/stock management, collections, shopping cart, checkout, discount codes, orders, and a made-to-measure workflow with custom measurement capture.
- Designed backend services and database models with PostgreSQL and Prisma, maintaining relationships and data integrity across products, customers, carts, and historical orders.
- Integrated Flutterwave payment processing supporting card, bank transfer, and USSD payment flows.
- Built a role-protected admin panel with CRUD operations for products, collections, site content, and orders, plus authenticated maintenance-mode bypass.
- Implemented automated inventory lifecycle management using scheduled jobs, including stale-product archiving, restoration/renewal tooling, and protections against deleting products with historical order relationships.
- Built Playwright end-to-end tests covering critical customer and administrative flows including browsing, cart, checkout, and admin operations.
- Integrated Brevo transactional and campaign email workflows, automated double opt-in verification and discount-code generation, and built an exit-intent newsletter acquisition flow with frequency controls.

- Implemented TikTok Pixel/Events API and Google Analytics tracking for key commerce funnel events including ViewContent, AddToCart, InitiateCheckout, and Purchase.

Convertly Platform — Automated Lead Conversion System

React.js · TypeScript · Node.js · Nest.js · Express.js · REST APIs · AI Integration · WhatsApp Automation

- Designed a modular full-stack platform combining conversion-focused websites, AI-assisted customer chat, booking workflows, and lead management.
- Built frontend and backend modules that connect customer interactions, APIs, booking systems, and lead data into a unified application.
- Integrated an AI response layer to automate customer inquiries while maintaining structured lead information for downstream business workflows.

Client Onboarding Automation System

Node.js · TypeScript · Google Sheets API · Email Automation · Form Integration

- Built an automated onboarding workflow that processes form submissions, triggers personalised email sequences, updates Google Sheets, and notifies teams without manual intervention.
- Eliminated 8+ manual intake steps by connecting form processing, data storage, notifications, and email automation into a single workflow.

EDUCATION

BSc Computer Science | Redeemers University

Expected 2028

ADDITIONAL STRENGTHS

- End-to-end ownership across requirements, architecture, implementation, API integration, database design, testing, deployment, and maintenance.
- Strong debugging mindset with experience diagnosing frontend, backend, database, integration, and deployment issues.
- Product-minded engineering approach focused on maintainability, performance, reliability, and user experience.
- Comfortable working independently in remote environments and communicating technical decisions clearly.
