Full-Stack Developer & Founder, Convertly

✉ jegedetomiwa1@gmail.com | 🔗 <https://www.linkedin.com/in/tomiwa-jegede-417310263/> | 🖥️ <https://github.com/Tomiwa-Jegede> | 🌐 Available for Remote Roles

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and founder with a strong track record of building conversion-focused web applications and end-to-end business automation systems. Founder of Convertly, a digital growth company that helps businesses capture, manage, and convert more leads through AI, automation, and modern web technology. Combines deep technical expertise in React.js, Node.js, and REST APIs with a product and business mindset to deliver systems that generate measurable revenue outcomes. Actively seeking remote roles where engineering skill meets real-world impact.

CORE TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive UI Development

Backend: Node.js, Express.js, REST API Design & Integration

Integrations: Google Sheets API, Payment Gateways, Email Services, CRM Systems

Tools & Workflow: Git, GitHub, VS Code, Postman, Figma (prototyping)

Specialisations: Lead Conversion Systems, Business Automation, Booking Integrations, AI Bots

PROFESSIONAL EXPERIENCE

Founder & Lead Developer | [Convertly](#)

2024 – Present • Remote

- ▶ Founded and built Convertly — a digital growth company that designs automated sales and customer acquisition systems for SMEs.
- ▶ Architected and deployed conversion-focused websites and landing pages that reduce bounce rates and increase lead capture.
- ▶ Built AI-powered customer response bots enabling 24/7 automated inquiry handling, reducing response time from hours to seconds.
- ▶ Developed booking and scheduling system integrations that convert website visitors into confirmed appointments automatically.
- ▶ Designed and implemented lead tracking dashboards giving clients full visibility over their sales pipeline in real time.
- ▶ Built end-to-end business automation workflows eliminating manual, repetitive tasks across client operations.
- ▶ Integrated third-party APIs including Google Sheets, payment processors, and email marketing services into client systems.
- ▶ Managed full project lifecycle — from client discovery and system design through to deployment and post-launch optimisation.

Front-End Developer | [Freelance / Contract](#)

2022 – present • Remote

- ▶ Designed and developed responsive, high-performance web interfaces for clients across multiple industries.
- ▶ Built reusable React component libraries that accelerated development speed across multiple projects.
- ▶ Collaborated with stakeholders to translate business requirements into functional, user-friendly digital products.
- ▶ Integrated REST APIs and backend services into front-end applications ensuring seamless data flow and user experience.
- ▶ Optimised web applications for speed, accessibility, and cross-browser compatibility.

KEY PROJECTS

Convertly Platform — Automated Lead Conversion System

React.js · Node.js · Express · REST APIs · AI Integration · WhatsApp Automation

- ▶ Designed a modular, full-stack platform that bundles conversion website, AI chat, booking system, and lead dashboard into one cohesive product.
- ▶ Integrated AI response layer enabling businesses to respond to customer inquiries instantly without manual intervention.
- ▶ Built lead tracking module that aggregates inquiries from multiple channels (web, WhatsApp, social) into a single dashboard.
- ▶ Delivered measurable client outcomes including reduced response times, increased booking rates, and improved lead-to-customer conversion.

Client Onboarding Automation System

Node.js · Google Sheets API · Email Automation · Form Integration

- ▶ Built a fully automated client onboarding workflow that triggers personalised email sequences, populates Google Sheets, and notifies the team — all without manual input.
- ▶ Reduced client onboarding time by eliminating 8+ manual steps from the intake process.

EDUCATION

Bcs Computer Science | Redeemers University

2028

Continuous Learning: React.js Advanced Patterns · Node.js & API Development · Business Automation · AI Integration

WHAT I BRING TO A TEAM

- ▶ End-to-end ownership — I design, build, integrate, and deploy complete systems, not just individual components.
- ▶ Business-first thinking — I focus on outcomes (leads, conversions, revenue) not just clean code.
- ▶ Entrepreneurial experience — as a founder, I understand scope, deadlines, client communication, and product decisions.
- ▶ Adaptability — comfortable working across the full stack and picking up new tools quickly as project demands evolve.
- ▶ Remote-ready — experienced in async communication, self-management, and delivering independently across time zones.
